

**Amendments to the Claims:**

Please amend the claims as indicated below.

Please cancel claims 14-20 without prejudice.

Please add new claims 30-36 as presented below.

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

Claims 1-10 (canceled)

Claim 11 (currently amended): A ~~clamp/plug~~ connector for through-wall connection, comprising:

a clamp housing ~~including an insulating material~~;

a locking element for attaching the clamp housing to a wall; and

a pivotable actuation wedge connected as a single piece to the locking element,

wherein:

the locking element includes a clamp part configured to engage an inner edge of a through opening of the wall, and

a surface of the actuation wedge is configured to press against a side of the clamp part facing the actuation wedge.

Claim 12 (currently amended): The ~~clamp/plug~~ connector as recited in claim 11 wherein the locking element includes ~~first and second another clamp parts part, and~~

the clamp parts are configured to respectively engage upper and lower inner edges of a through opening of the wall.

Claim 13 (currently amended): The ~~clamp/plug~~ connector as recited in claim 12 wherein the clamp parts are configured to project through the wall.

Claim 14-20 (cancelled)

Claim 21 (currently amended): A ~~The clamp/plug~~ connector as recited in claim 11 for through-wall connection, comprising:

a clamp housing including an insulating material;

a locking element for attaching the clamp housing to a wall; and

a pivotable actuation wedge connected as a single piece to the locking element,

wherein the clamp housing includes a plurality of disk-shaped contact housings attached to one another, and further comprising a terminating attachment plate.

Claim 22 (currently amended): ~~The clamp/plug~~ connector as recited in claim 12 wherein the clamp housing includes a plurality of disk-shaped contact housings attached to one another, and further comprising a terminating attachment plate.

Claim 23 (currently amended): ~~The clamp/plug~~ connector as recited in claim 11 wherein the locking element includes a flexible connection web disposed on a clamp leg, the actuation wedge being connected to the clamp leg via the flexible connection web.

Claim 24 (currently amended): A ~~The clamp/plug~~ connector as recited in claim 11 for through-wall connection, comprising:

a clamp housing including an insulating material;

a locking element for attaching the clamp housing to a wall; and

a pivotable actuation wedge connected as a single piece to the locking element.

wherein:

the locking element includes a clamp part configured to engage an inner edge of a through opening of the wall, and

a first surface of the actuation wedge and a second surface of a side of the clamp part facing the actuation wedge each include a respective slip safety device.

Claim 25 (currently amended): ~~The clamp/plug~~ connector as recited in claim 24 wherein each of the respective slip safety devices includes respective teeth.

Claim 26 (currently amended): The clamp plug connector as recited in claim 11 wherein the actuation wedge includes an insertion opening configured to receive an actuation tool.

Claim 27 (currently amended): The ~~clamp~~plug connector as recited in claim 11 wherein the locking element includes a first and second flexible clamp legs elastically movable toward each other so as to automatically engage an opening of the wall upon an insertion of the ~~clamp~~plug connector in the opening.

Claim 28 (currently amended): The ~~clamp~~plug connector as recited in claim 12 wherein the locking element includes a first and second flexible clamp legs elastically movable toward each other so as to automatically engage an opening of the wall upon an insertion of the ~~clamp~~plug connector in the opening.

Claim 29 (currently amended): The ~~clamp plug~~ connector as recited in claim 11 wherein the wall is a wall of a device or housing.

Claim 30 (new): The connector as recited in claim 11 wherein the clamp housing includes a plurality of disk-shaped contact housings attached to one another, and further comprising a terminating attachment plate.

Claim 31 (new): The connector as recited in claim 24 wherein the clamp part is configured to project through the wall.

Claim 32 (new): The connector as recited in claim 24 wherein the clamp housing includes a plurality of disk-shaped contact housings attached to one another, and further comprising a terminating attachment plate.

Claim 33 (new): The connector as recited in claim 24 wherein the locking element includes a flexible connection web disposed on a clamp leg, the actuation wedge being connected to the clamp leg via the flexible connection web

Claim 34 (new): The connector as recited in claim 24 wherein the actuation wedge includes an insertion opening configured to receive an actuation tool.

Claim 35 (new): The connector as recited in claim 24 wherein the locking element includes first and second flexible clamp legs elastically movable toward each other so as to automatically engage an opening of the wall upon an insertion of the connector in the opening.

Claim 36 (new): The connector as recited in claim 24 wherein the wall is a wall of a device or housing.
